## A Modern Communication System for Business

### DATA SHEET

#### PBX Features

- Attended Transfer
- Automated Attendant (IVR)
- Blind Transfer
- Call Detail Records (CDR)
- Call Forward
- Call Parking
- Call Pickup
- Call Waiting
- Caller ID
- Conference
- Conference Notice by Email
- Conference PIN-less Remote Access
- Conference Playback
- Conference Recording
- Do Not Disturb (DnD)
- Follow me
- Music on Hold
- Music on Transfer
- Queue
- Ring Group
- Speed Dial (Depends on Phone)
- Voicemail
- Voicemail Forwarding
- Voicemail to Email

#### Web Portal

- Signup and Make Payments
- Create and Manage Extensions
- Record Messages for IVR, Voice Broadcast
- Configure IVR, Follow-me, Ring Group, etc.
- Get Help, Create Support Ticket
- View Call Detail Records, History, Charts, etc.
- Bulk Broadcast Voice, Email & SMS Messages

#### Mobile Phone App - VoipSys

- Available in Google Play Store
- Quick Configuration (1 minute)
- Push Notification to Wake-up App

#### Voice Processing

- Protocol: SIP (RFC3261), DECT 6.0
- Transport: UDP, TCP, TLS, SRTP (default)
- DTMF: RFC2833, SIP INFO, In-band
- Codec: Opus (default), G.711a/u-law, G.722, G.726, G.729, GSM, ADPCM, iLBC, Speex, LPC10, SLIN, Siren

#### Advanced Features

- Broadcast Recorded Message
- Bulk Email
- Bulk SMS
- Get GSM SIM Card Balance
- Graphs
- Integrated GSM Gateway
- Least Cost Routing (LCR)
- Playback Recorded Message
- Real-time Status
- Recharge GSM SIM Card
- Record Message
- Reminder Service
- Remote Help
- SMS Info Service
- Transcript Service
- Web GUI
- Wi-Fi Connectivity
- Multi-Tenant PBX

#### Security

- Firewall
- SIP TLS transport
- SRTP (RTP encryption, default)

#### Customer Internal Network

- LAN
- DHCP
- Switch
- Router
- Static or Dynamic IP
- Wi-Fi, Wi-Fi Extender

#### Cloud Data Center

- Tier III Data Center
- 99.99% Uptime
- Realtime Backup
- Backup Generator and Multiple Uplinks
- Failover to Backup PBX Within Minutes
- Primary & Backup PBX in Separate Data Centers

#### White Label

- Rebrand the PBX service as your own
- Use your own logo, logo and identity
- Faster time to market

**DATA SHEET**

Web Portal

<https://www.alphadatasolutions.net>

The screenshot shows a web browser window with the URL [alphadatasolutions.net](https://www.alphadatasolutions.net). The page features a dark navigation bar with the Alpha Data Solutions logo and menu items: Home, Screens, Pricing, White Label, Support, Company, and Account. Below the navigation bar is a grey header with the text "Communicate Easily". The main content area has a white background with the heading "Easy business communication starts here with Cloud PBX". An image shows a smartphone, a laptop displaying a web interface, and a desk phone. A list of features includes: Extension Dialing, Virtual Assistant, Conference Call, Call Center, and Many More. Two buttons are present: a yellow "See Pricing" button and a blue "View Features" button. Below this is another grey header with the text "Manage from Web Portal". At the bottom, a partial view of a table is visible with columns for "Account" and "Call Center Chat".

# Alpha Data *PBX*

## DATA SHEET

Web Portal > **Dashboard Menu**

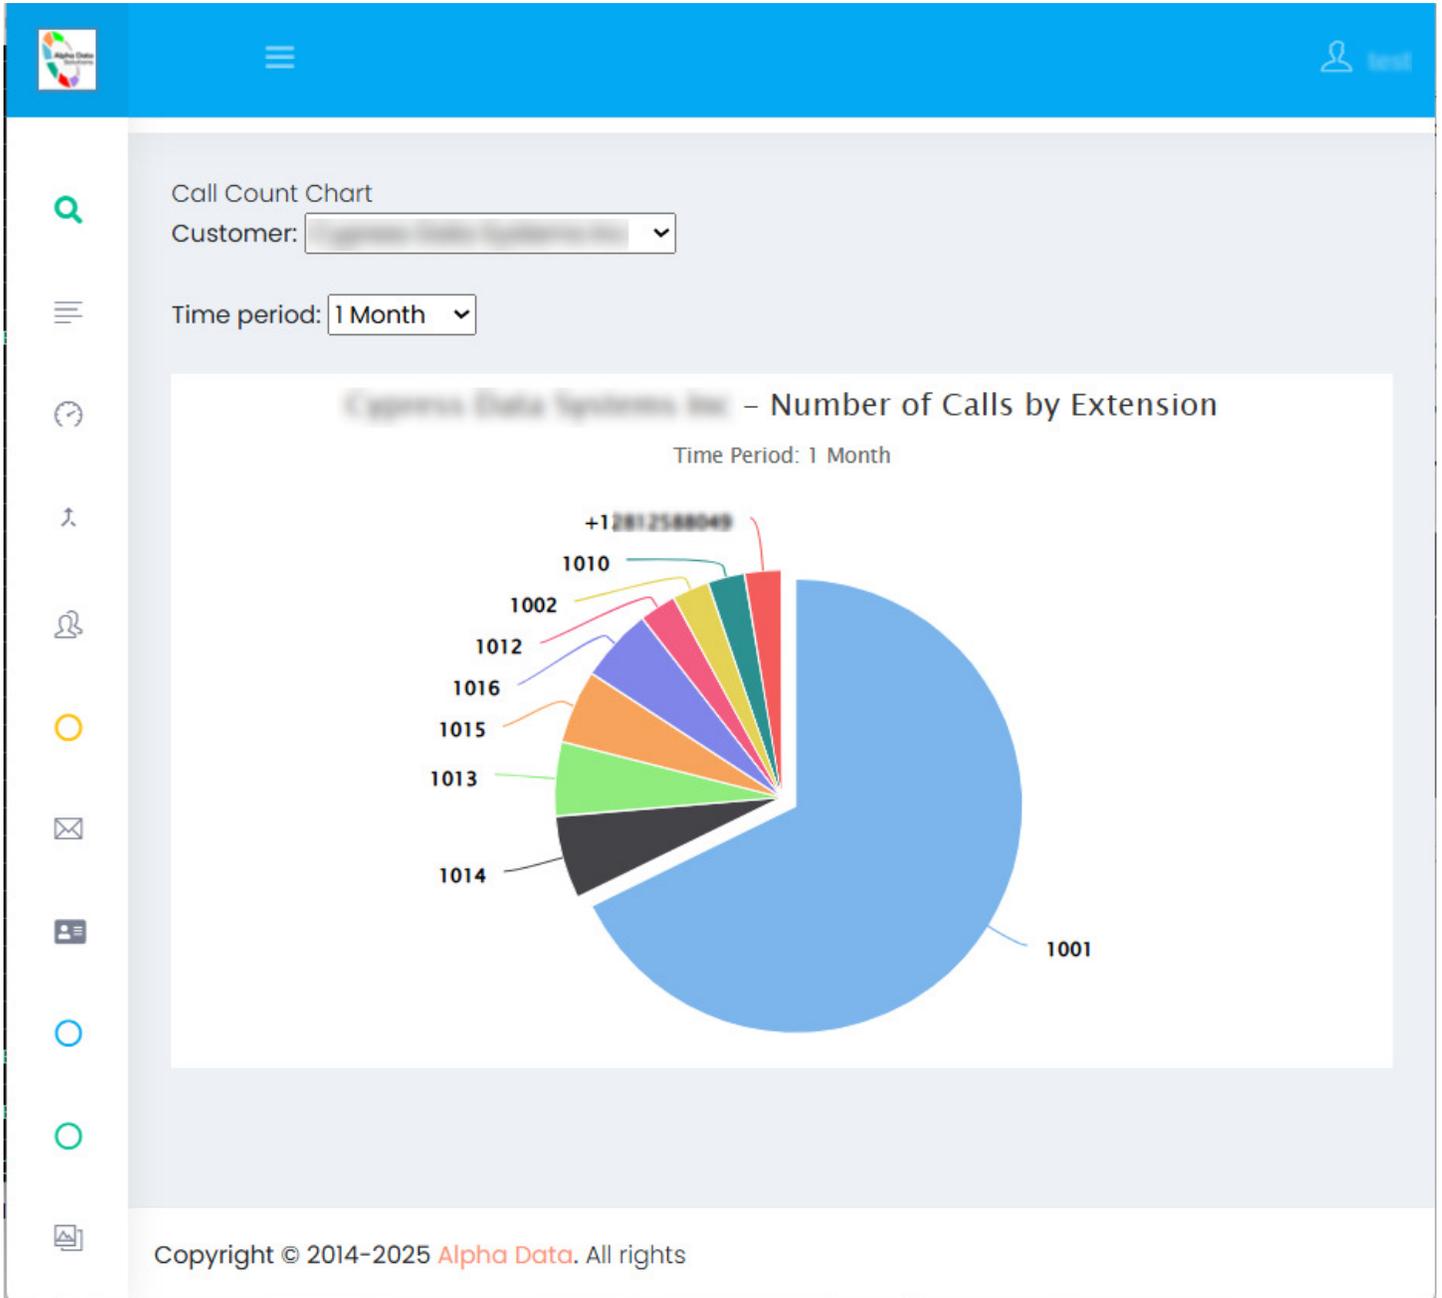

The screenshot shows a web browser window with the URL `alphadatasolutions.net/`. The page features a blue header with the Alpha Data logo on the left, a hamburger menu icon in the center, and a user profile icon on the right. A sidebar menu is open on the left, listing various navigation options: Search, Account, Bulk Broadcast, Call History, Conference, Follow Me, Help, Home (highlighted), IVR, Pay-Paystack NG, Phone - User, Queue, Ring Group, Reminder, Transcript, and Transfer. The main content area is mostly blank, with a light blue search bar at the top. A small dropdown arrow is visible next to the 'Account' menu item. At the bottom of the page, there is a footer that reads "Data. All rights".

# Alpha Data PBX

## A Modern Communication System for Business

### DATA SHEET

#### Data Consumption and Cost

VoIP calls consume data and the amount of data depends on the codec used to transform digital packets to sound.

The VoipSys app that comes with Alpha Data PBX uses Opus codec which is highly efficient and adapts its bitrate based on network conditions.

Typically, a good quality voice call with Opus codec consumes approximately 1MB of data per minute.

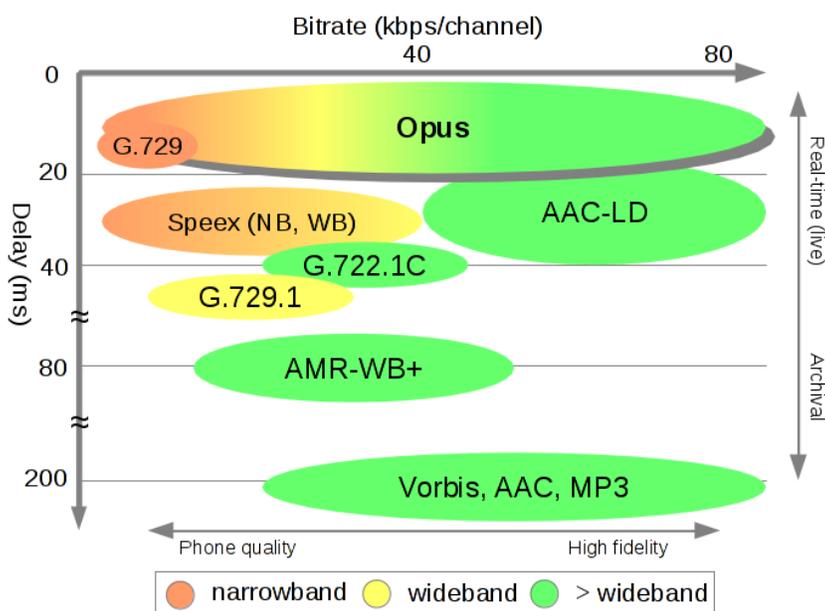

In March 2026, a typical data plan was 1,000MB (1GB) for N500 i.e. N0.50 per MB equivalent to:

- N0.83 Kobo per second
- 50 Kobo per minute
- N0.50 per minute
- N30.00 per hour.

So, in addition to the subscription cost, users that connect to the PBX through the data plans in their mobile phone should expect to consume data at the rate of approximately one Naira (N0.50 – 50 Kobo) per minute. However, this cost is not applicable if internet connection is made through free Wi-Fi or through free wired connection by desk phones in a LAN.

#### More Information on Opus Codec Bandwidth & Data Usage (Source: ChatGPT, March 29 2026)

The **Opus codec** is highly efficient and adapts its bitrate based on network conditions. Below is the typical data usage per minute:

# Alpha Data *PBX*

A Modern Communication System for Business

## DATA SHEET

### Bitrate Data per Minute Quality Level

8 kbps	~0.5 MB/min	Low (narrowband)
12 kbps	~0.75 MB/min	Basic voice
<b>16 kbps</b>	<b>~1.0 MB/min</b>	<b>Good voice</b>
24 kbps	~1.5 MB/min	HD voice
32 kbps	~2.0 MB/min	Premium HD

Includes IP/UDP/RTP overhead approximation

---

### 💰 Cost per Minute (Based on Data Pricing)

Assuming typical mobile data pricing in Nigeria:

- ₦500 per 1GB (≈ ₦0.0005 per MB)

### Bitrate Data/Min Cost/Min (Data Only)

8 kbps	0.5 MB	~₦0.25/min
12 kbps	0.75 MB	~₦0.38/min
<b>16 kbps</b>	<b>1.0 MB</b>	<b>~₦0.50/min</b>
24 kbps	1.5 MB	~₦0.75/min
32 kbps	2.0 MB	~₦1.00/min

---

### 📞 Total VoIP Call Cost (Real-World)

Call Type	Estimated Total Cost/Min
On-net (PBX to PBX)	₦0.25 – ₦1.00/min (data only or free on Wi-Fi)
VoIP → Mobile (Nigeria)	₦3 – ₦15/min
VoIP → International	₦5 – ₦30/min

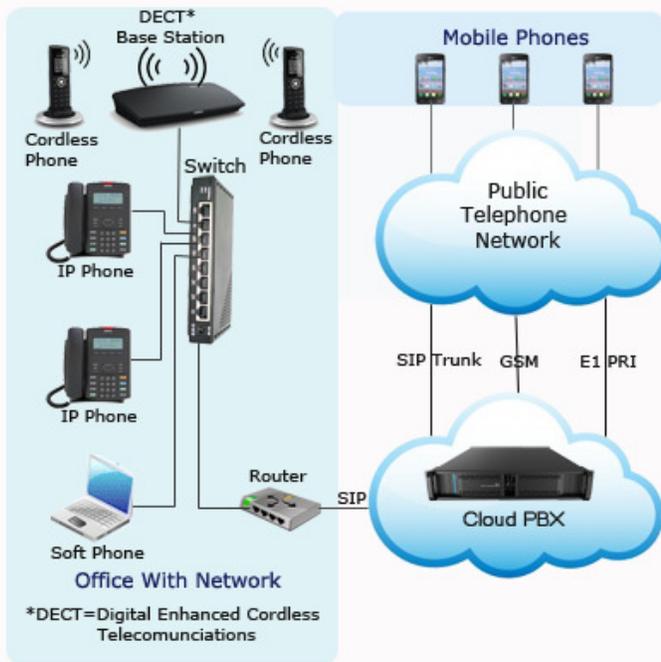

# Alpha Data *PBX*

A Modern Communication System for Business

## DATA SHEET

### Architecture Diagrams – Cloud and Onsite PBX

#### Cloud PBX

#### On Site PBX

Both the Cloud and On Site PBX have the same features and capabilities.

#### SUMMARY:

Robust, easy to use Unified Communication System for offices, schools, hospitals, etc.

Can use SIP Trunk, GSM Gateway, E1 PRI to connect to the Public Telephone Network.

Seamlessly integrates mobile phones, cordless handsets and wired/wireless IP phones.

Can send bulk SMS, bulk email, bulk voice message with real-time status, reports and graphs.

Multi-tenant capable with individual admin panel that is accessible from a web browser.

Can be managed from a responsive web interface that has the same look and feel in a mobile phone, tablet, laptop and desktop computer.

Powered by octa-core CPU with RAID-1 data backup.

Pricing options: VoIP phone service, lease, rent, buy.

#### FEATURES:

- Attended and Blind Transfer
- Auto Attendant
- Bulk SMS, Email and Voice Message
- Call Center Queues
- Call Forward
- Call Parking/Pickup
- Call Waiting
- Conference
- Conference Recording
- Database Integration
- Detailed Call Records, Graphs
- Do Not Disturb
- Follow Me
- Graphical User Interface (GUI)
- GSM Gateway for External Calls
- Interactive Voice Response (IVR)
- Music on Hold/Transfer
- Real-time Status
- Record, Broadcast Voice Message
- Reminder
- Ring Group
- Voicemail, Voicemail To Email
